# BSC 295 Intro. to Evolution

## MWF 9:35-10:25

**“Evolution is the fundamental idea in all of life science - in all of biology.”**

**-Bill Nye the Science Guy**

In this team-taught, lecture and discussion-based introductory course, students will learn about: The “evolution” of evolutionary theory; Sources of variation; Micro- and Macroevolution; The tree of life; The role of the fossil record, including that of our own lineage, in evolution theory.
